I am a frontend web developer with an eagerness to bring quality ideas to life and build customer-centric products. I portray a positive attitude to work and I adapt quickly to work with new people and technologies.

WORK EXPERIENCE

Side hustle
(January 13, 2018 - April 19, 2018)

Frontend web developer intern

I worked with my lead and instructors to develop web applications which were landing pages such as staticz.netlify.app, foodie-page-landing.netlify.app, everythingsquidgame.netlify.app e.t.c that were fully functional.

HNG internship
(April 09, 2018 - August 10, 2018)

Frontend web developer intern

Worked alone to Build my first portfolio website, a calculator app (calculator-eniolacodes.netlify.app), a note taking app (note-taking-app-eniolacodes.netlify.app), then Collaborated with a team to build an authentication and cart system using React.js as our tech stack, which we completed successfully

Contract developer
(September 03, 2018 - December 22, 2019)

Frontend web developer

I worked for businesses and brands by developing web applications to solve their business/brand needs and helping them serve their customers better, a few are ad-promoter.com, earlybean.co, truesaver.net, theplugdemo.netlify.app, gatewaylux.netlify.app, foodapp-byeniola.netlify.app, e.t.c

Uniskills
(January 09, 2020 - February 10, 2021)

Frontend Web Developer

• I worked hand in hand with my team to accomplish tasks and deliver before the deadline.
• I avoided technical debt on the project by properly researching 3rd party libraries before usage, reviewing commits before merging, and refactoring codes to the best practices.
• I lead the development of some web app pages including the dashboard pages, student details, student listing, job listing e.t.c
• I support accountability by providing easy-to-understand daily reports, responses, and feedback to my lead.
• I am very punctual to meetings and standups and I share and believe in ideas that can lead to company growth.

Spotmate
(January 12, 2021 - Present)

Frontend Lead Developer

• I led and worked hand in hand with my team to accomplish tasks and deliver before the deadline.
• I worked on the feed, workout log, and messages features.
• I have a great focus on performance, accessibility, usability, and S.E.O. by making the application provide data faster, responsive, properly tested, and follow the correct user flow.
• I avoided technical debt on the project by properly researching 3rd party libraries before usage, reviewing commits before merging, and refactoring codes to the best practices.
• I improved accountability for my team by creating a knowledgebase and by providing daily reports, responses, and feedback to my lead.
• I am punctual at meetings and standups and put action into ideas that can lead to business growth and customer satisfaction.
